

Instructor guide

Algo Quant — Academy management system — from first enquiry to certificate

Version 1.0 · **Date** 26 September 2026

This guide is written for the privilege **Instructor**

Their courses and sessions, recording attendance, their wallet and session fees, and the student evaluations report.

Contents

Read the first chapter, then go straight to the one that covers your work.

1 **Before you start** — What the system does, who sees what, and how to sign in.

2 **The work screen** — The parts that stay on screen wherever you are.

3 **The dashboard** — The first screen after signing in; its contents follow your privileges.

4 **Courses** — Creating them, their lifecycle, sessions and attendance.

5 **Tasks** — The team’s task board across every course.

6 **Employee wallets** — Your balance, your session fees, your withdrawals and advances.

7 **Reports** — Six reports, each with its own privilege.

8 **Chat** — The team channel and private messages.

9 **Student evaluations** — From starting a campaign to reading the result.

10 **Quick reference** — Tables to come back to when you need them.

Chapter 1

Before you start

What the system does, who sees what, and how to sign in.

Algo Quant holds the academy's whole cycle in one place: it starts with someone asking about a course, runs through enrolling, paying and attending, and ends with a certificate and an evaluation — with every amount in and out recorded on the way.

The idea in short

Everything is connected to something else. A lead becomes a student, the student is enrolled in a course, the course has sessions, tasks and evaluations, payments become revenue, and sessions become fees in the instructor's wallet. You never enter the same fact twice: record it once where it belongs and it appears on the other screens by itself.

Lead → Convert & collect → Enrolled student → Attendance → Certificate → Evaluation

The six privileges

The system has no notion of job titles — only **six privileges**. One employee can hold more than one, and the administrator privilege opens everything.

Administrator

Every screen and every action, including settings, the activity log, owner withdrawals and deleting records.

Sales

Leads and turning them into students, read access to students, and the marketing and lead-demand reports.

Operations

Courses, sessions, attendance and certificates, creating and enrolling students, and the course reports.

Accounting

The whole of finance: payments, expenses, refunds, withdrawal requests, profit shares and the financial reports.

Media

Media tasks and course files. No access to students, finance or leads.

Instructor

Their courses and sessions, recording attendance, their wallet and session fees, and the student evaluations report.

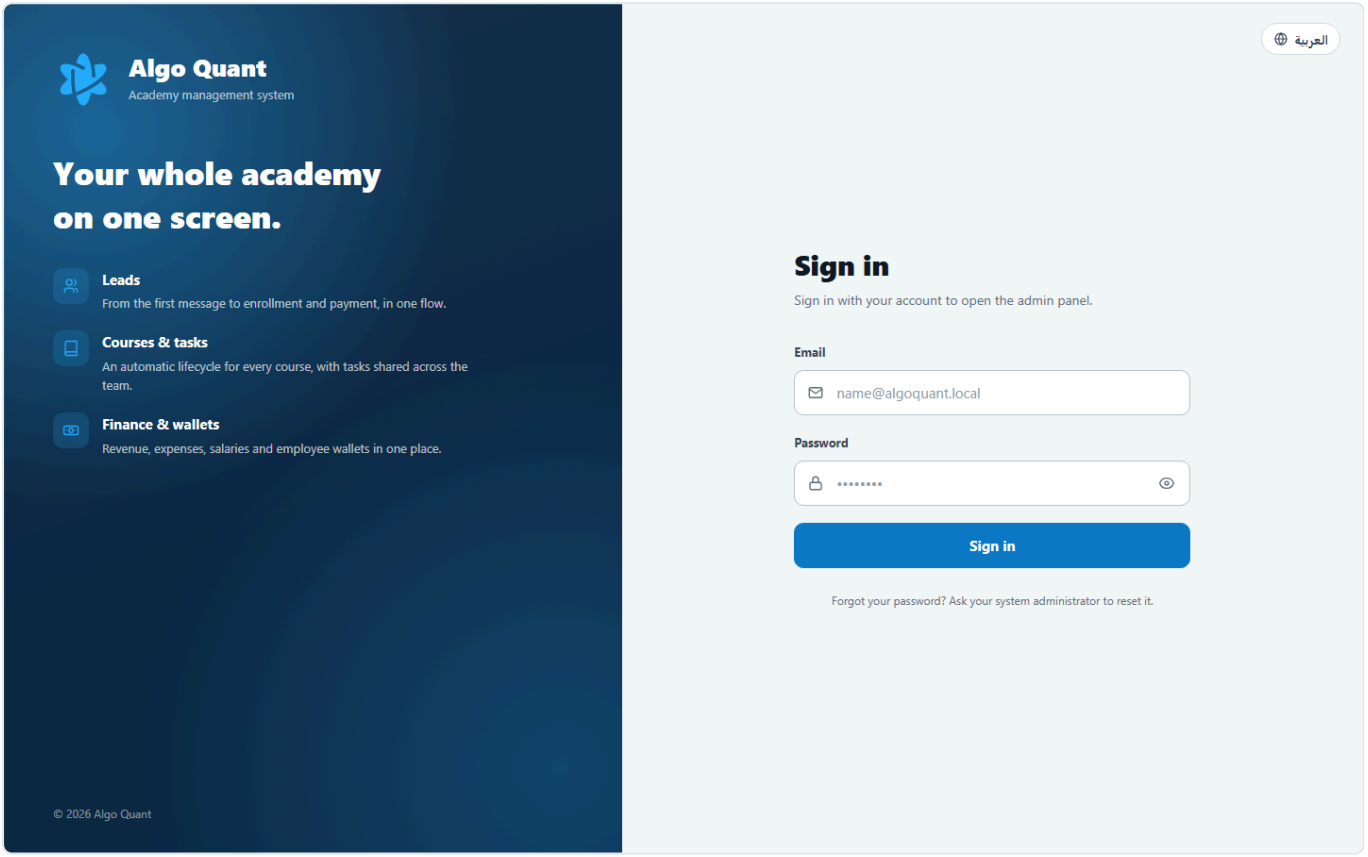

Why can't I see a page my colleague sees?

Because your privileges do not include it. If you open a link to a page you may not see, the system takes you to the dashboard and tells you why. The full table is in the last chapter.

Signing in

Open the system link in a browser. There is no self sign-up: the administrator creates your account under **Settings** → **Employees & privileges** and gives you your email and first password.

1. Enter the **email address** your administrator gave you.
2. Enter your **password**. The eye icon reveals it so you can check it.
3. Press **Sign in**. The dashboard that matches your privileges opens.

> **The sign-in screen.** Forgot your password? There is no self-service reset — ask your administrator to set a new one from the employees page.

> **Your password is yours alone**
>
> Never share your account. Every action is recorded against whoever performed it in the **activity log**, so anything done with your account appears under your name.

Chapter 2

The work screen

The parts that stay on screen wherever you are.

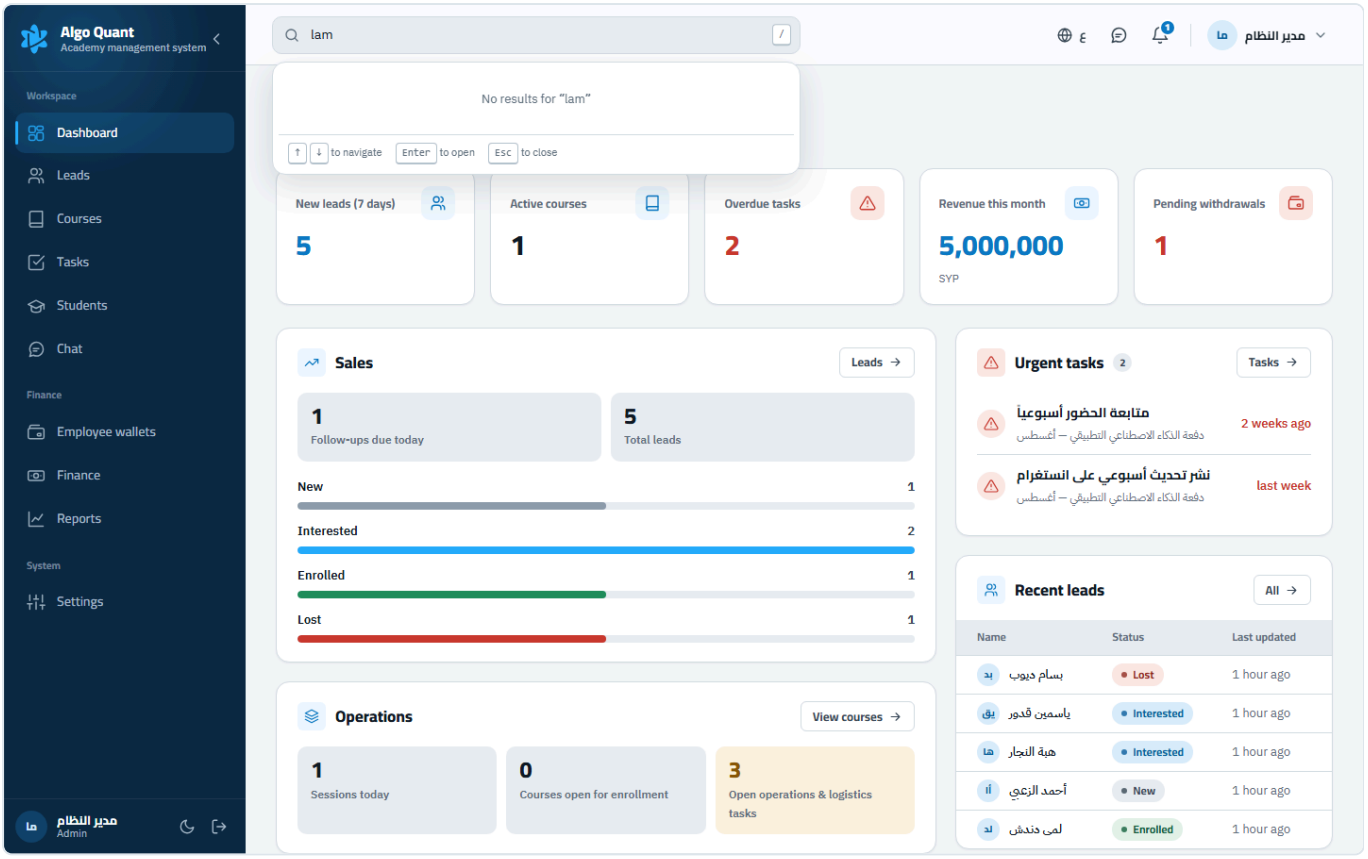

The sidebar

The sidebar is split into three groups: **Workspace** (dashboard, leads, courses, tasks, students, chat), **Finance** (employee wallets, finance, reports) and **System** (settings). Only the pages your privileges allow appear in it.

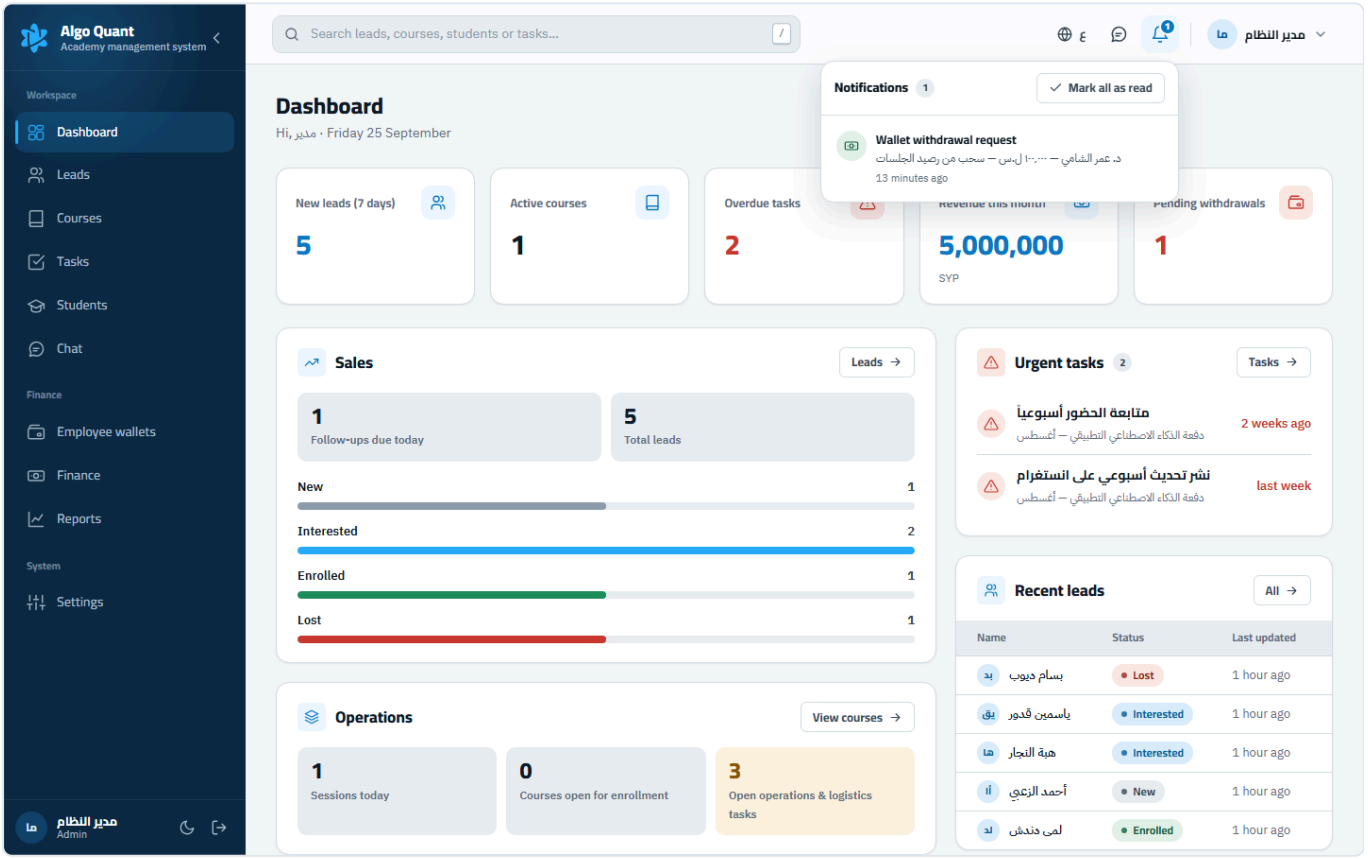

The arrow at the top collapses it to a narrow icon rail when you want more room for the table you are working on.

The top bar

Search	Searches leads, courses, students and tasks at once. Press `/` anywhere to jump into it.
The bell	Unread notifications. Clicking one opens the right page on the right tab.
The chat bubble	A shortcut to chat, badged with the number of unread messages.
EN / ع	Switches the interface between Arabic and English. The whole layout flips direction with it.
Your name	Your account menu. At the foot of the sidebar are two buttons: dark mode and sign out.

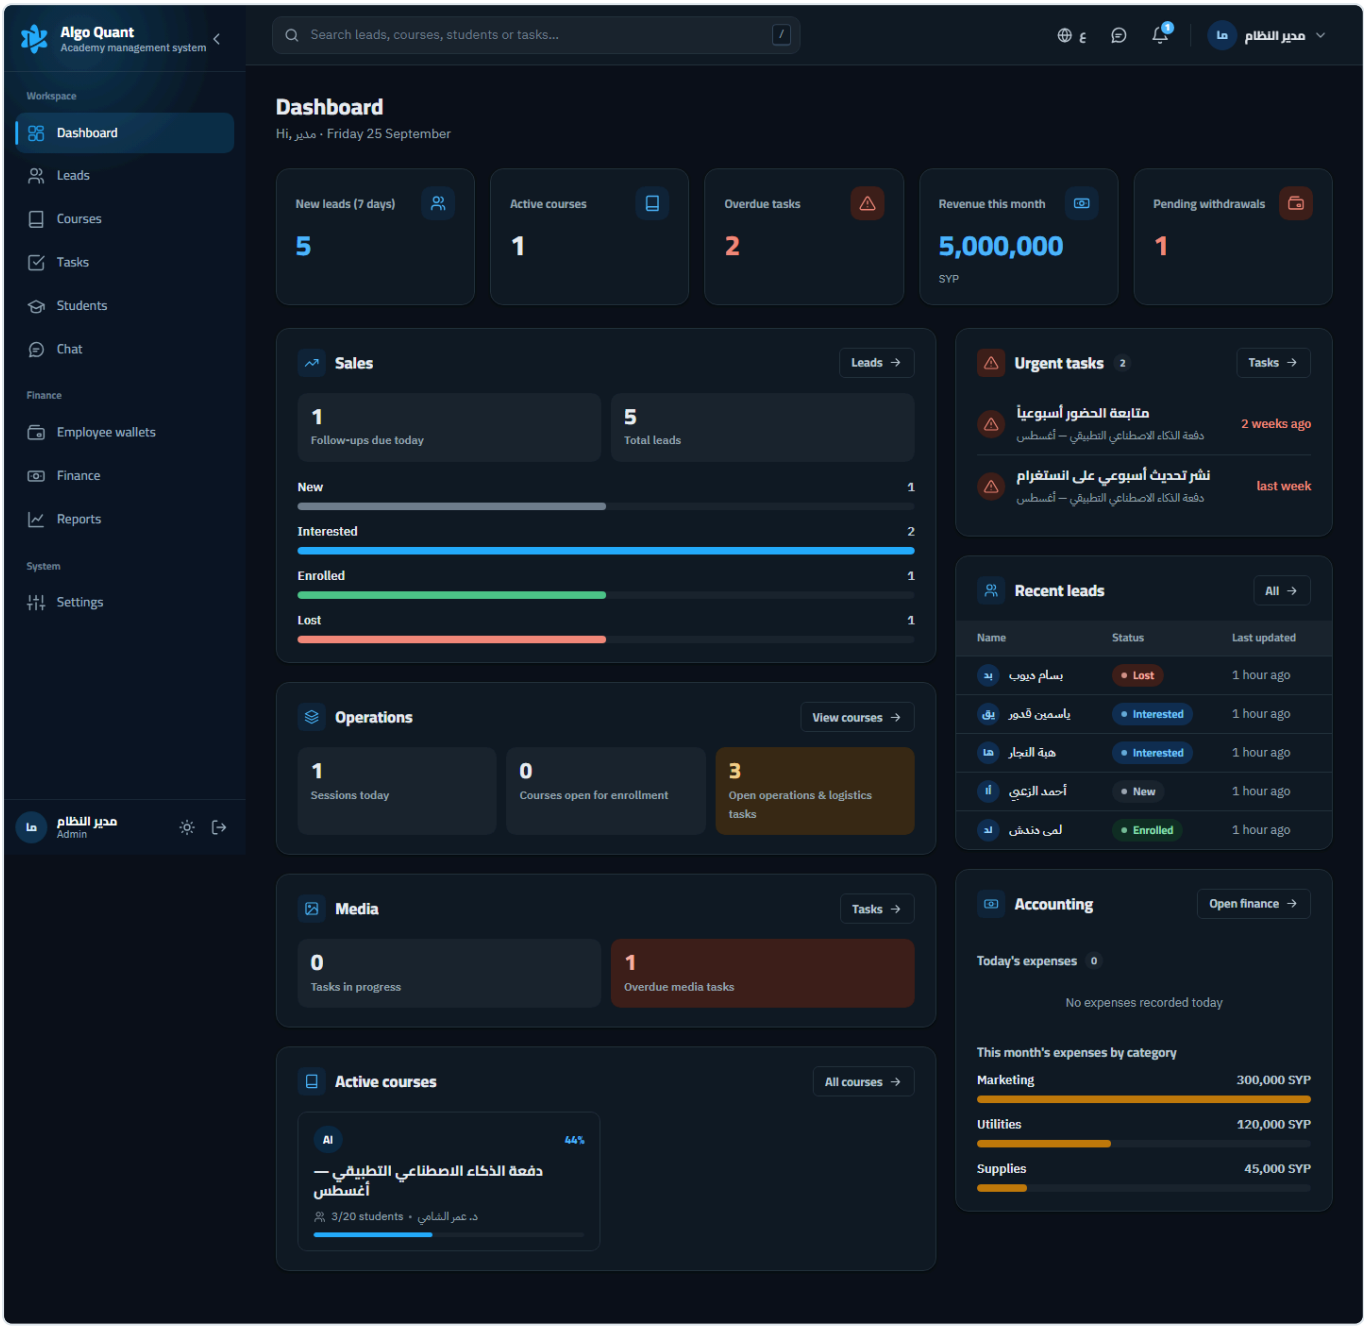

Global search. Results are grouped by type. Use the arrows to move, `Enter` to open, `Esc` to close.

Notifications. A task due soon, a late task, a new or stalled lead, a withdrawal request and its status, and evaluation links being ready.

Dark mode and phones

Everything works on a phone: the sidebar becomes a button, cards stack into one column, and wide tables scroll sideways inside their own cards.

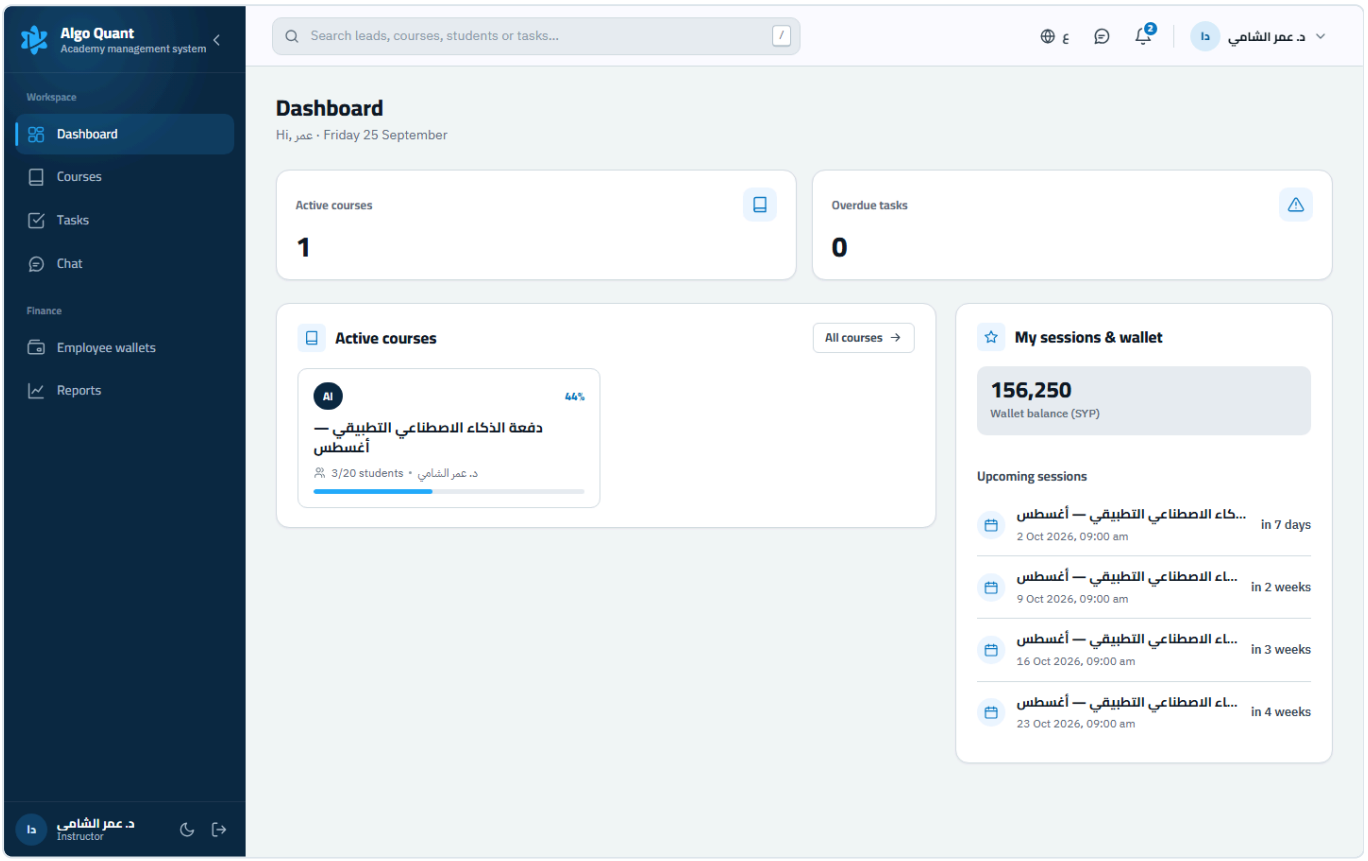

Dark mode. Toggled from the moon icon at the foot of the sidebar and remembered on your device.

Chapter 3

The dashboard

The first screen after signing in; its contents follow your privileges.

The dashboard is not one fixed page but a set of cards, of which you see the ones that concern you. The figures along the top are what needs attention today; below them sit detailed cards, each with a button through to the full page.

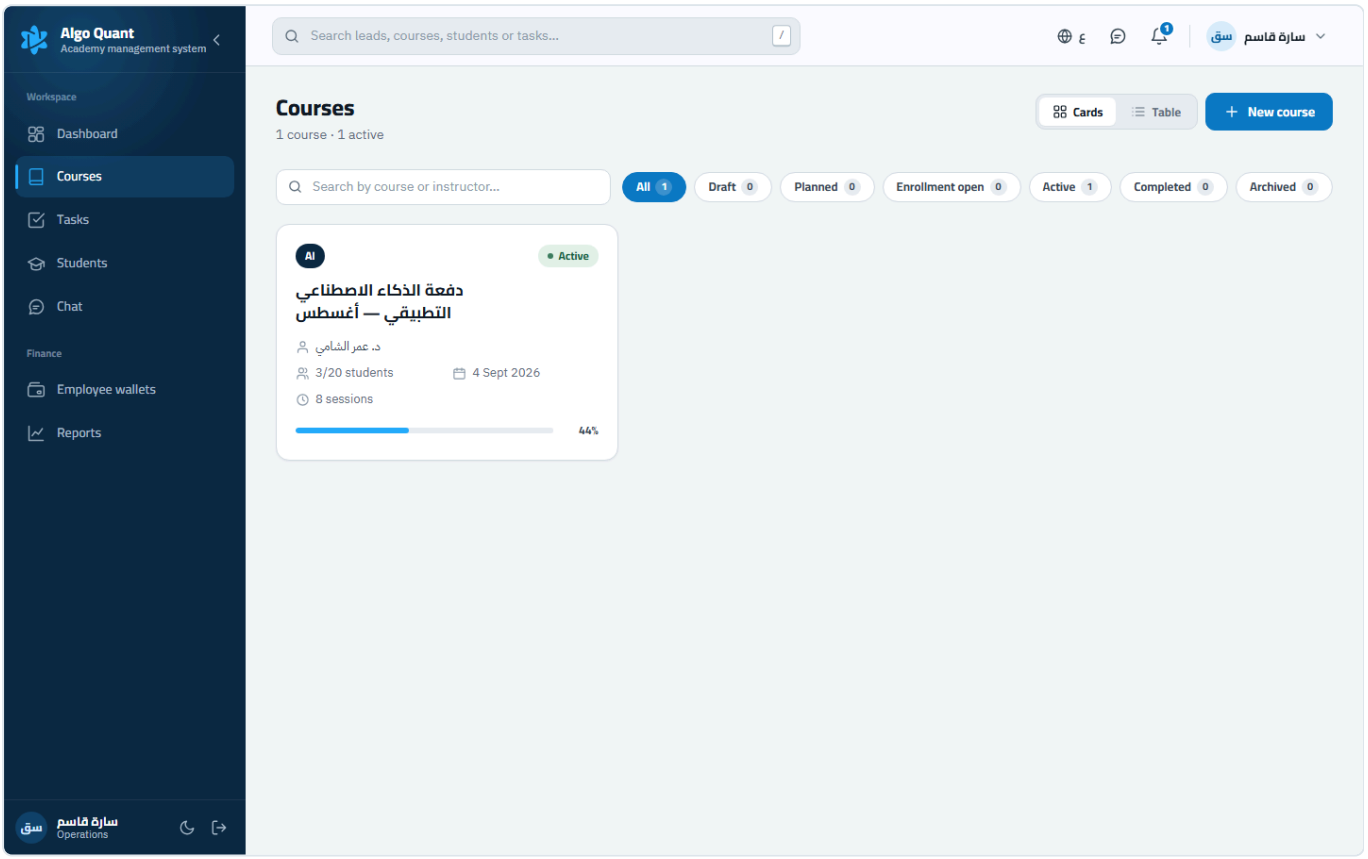

> **Instructor:** their active courses, their wallet balance, and their upcoming sessions with dates.

Chapter 4

Courses

Creating them, their lifecycle, sessions and attendance.

Everyone who signs in can see the courses; creating and editing them belongs to operations and the administrator. The list shows as cards or a table — switch with the button at the top.

Card view. Each card carries the track, the status, the instructor, students against capacity, the number of sessions and a task progress bar.

Course states

State	What it means	Moves to
Draft	Being prepared; not open for enrolment.	Planned · Archived
Planned	Dates are set; enrolment is not open yet.	Enrolment open · Archived
Enrolment open	Students can be enrolled now.	Active · Archived
Active	It has started and sessions are running.	Completed · Archived
Completed	Finished. Attending enrolments are completed automatically.	Archived
Archived	Out of circulation. Final.	—

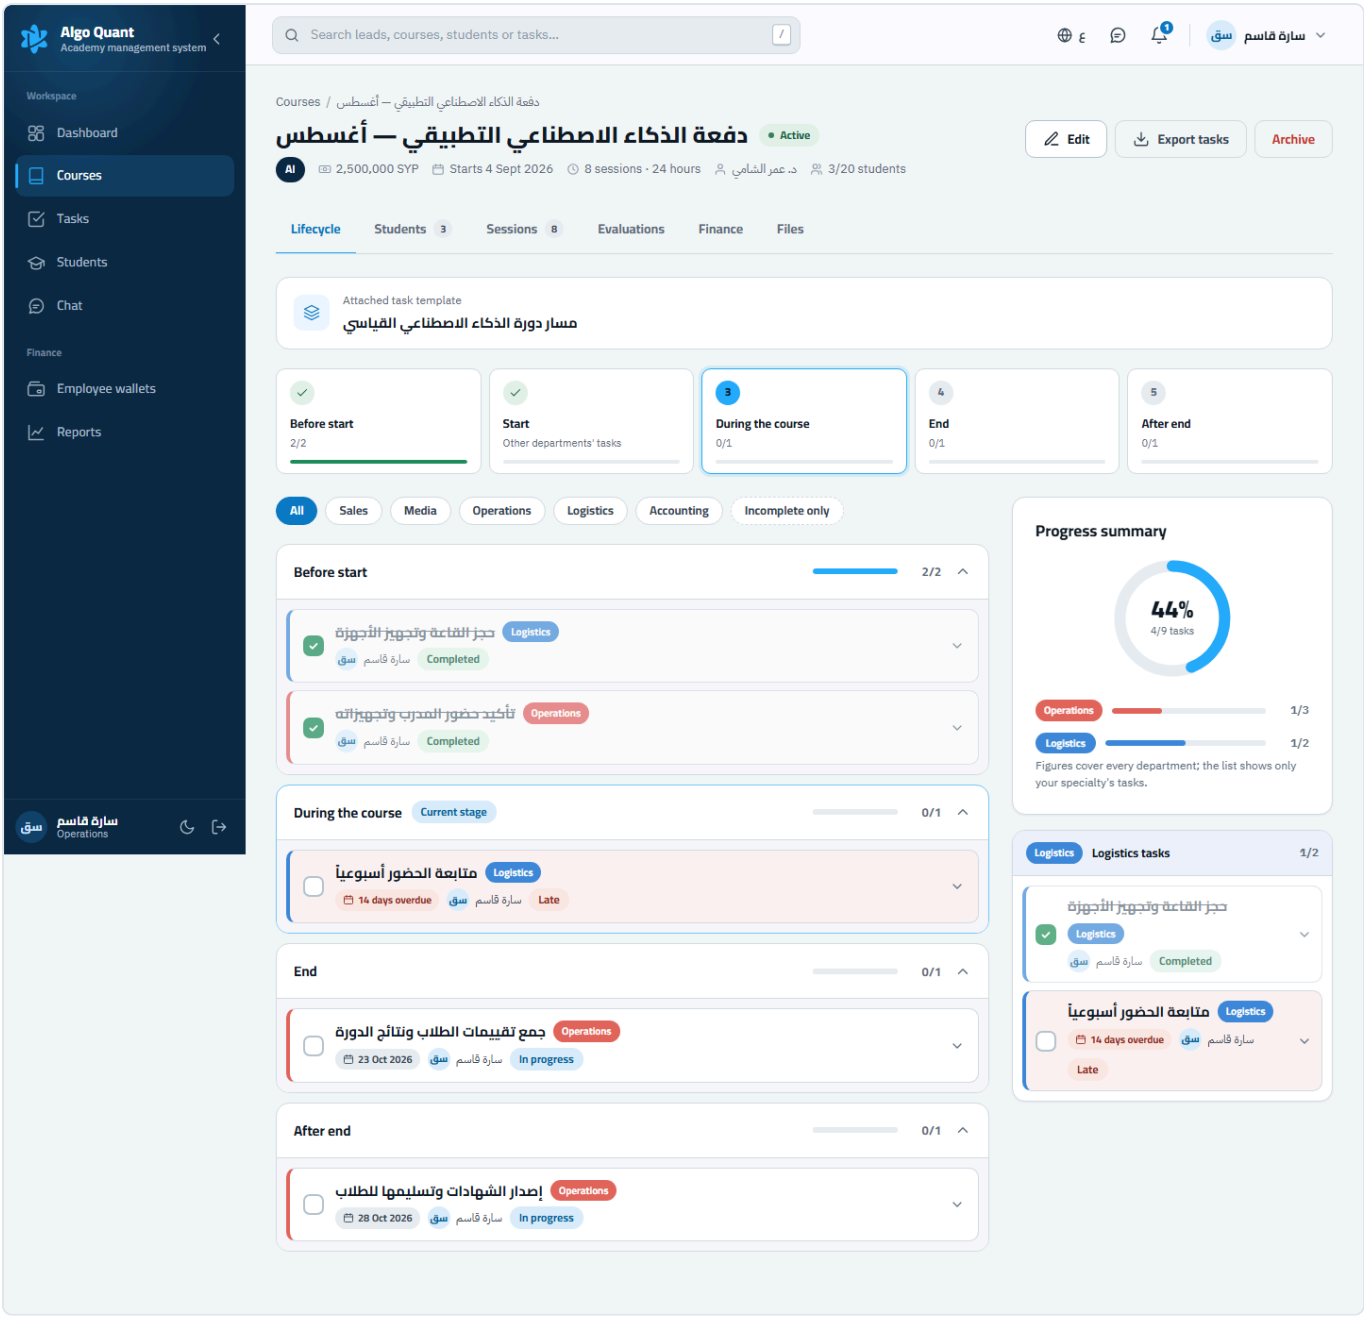

Instructor pay

Choose a percentage or an hourly rate, not both. The fee is worked out and added to the instructor's wallet automatically when a session is completed (that is, when its attendance is recorded), and shows there as a **Session fees** entry.

The lifecycle tab

A course's tasks are spread across five fixed stages, shown as a row of cards at the top of the tab, each with a done-of-total counter:

Stage	When
Before the start	Preparation before the course begins — confirming enrolments, booking the room, preparing equipment.
The start	The first session and getting under way.
In progress	Recurring work across the sessions — following up attendance, media posts.
The end	The last session: collecting evaluations, closing attendance.
After the end	Certificates, the course's financial report, archiving files.

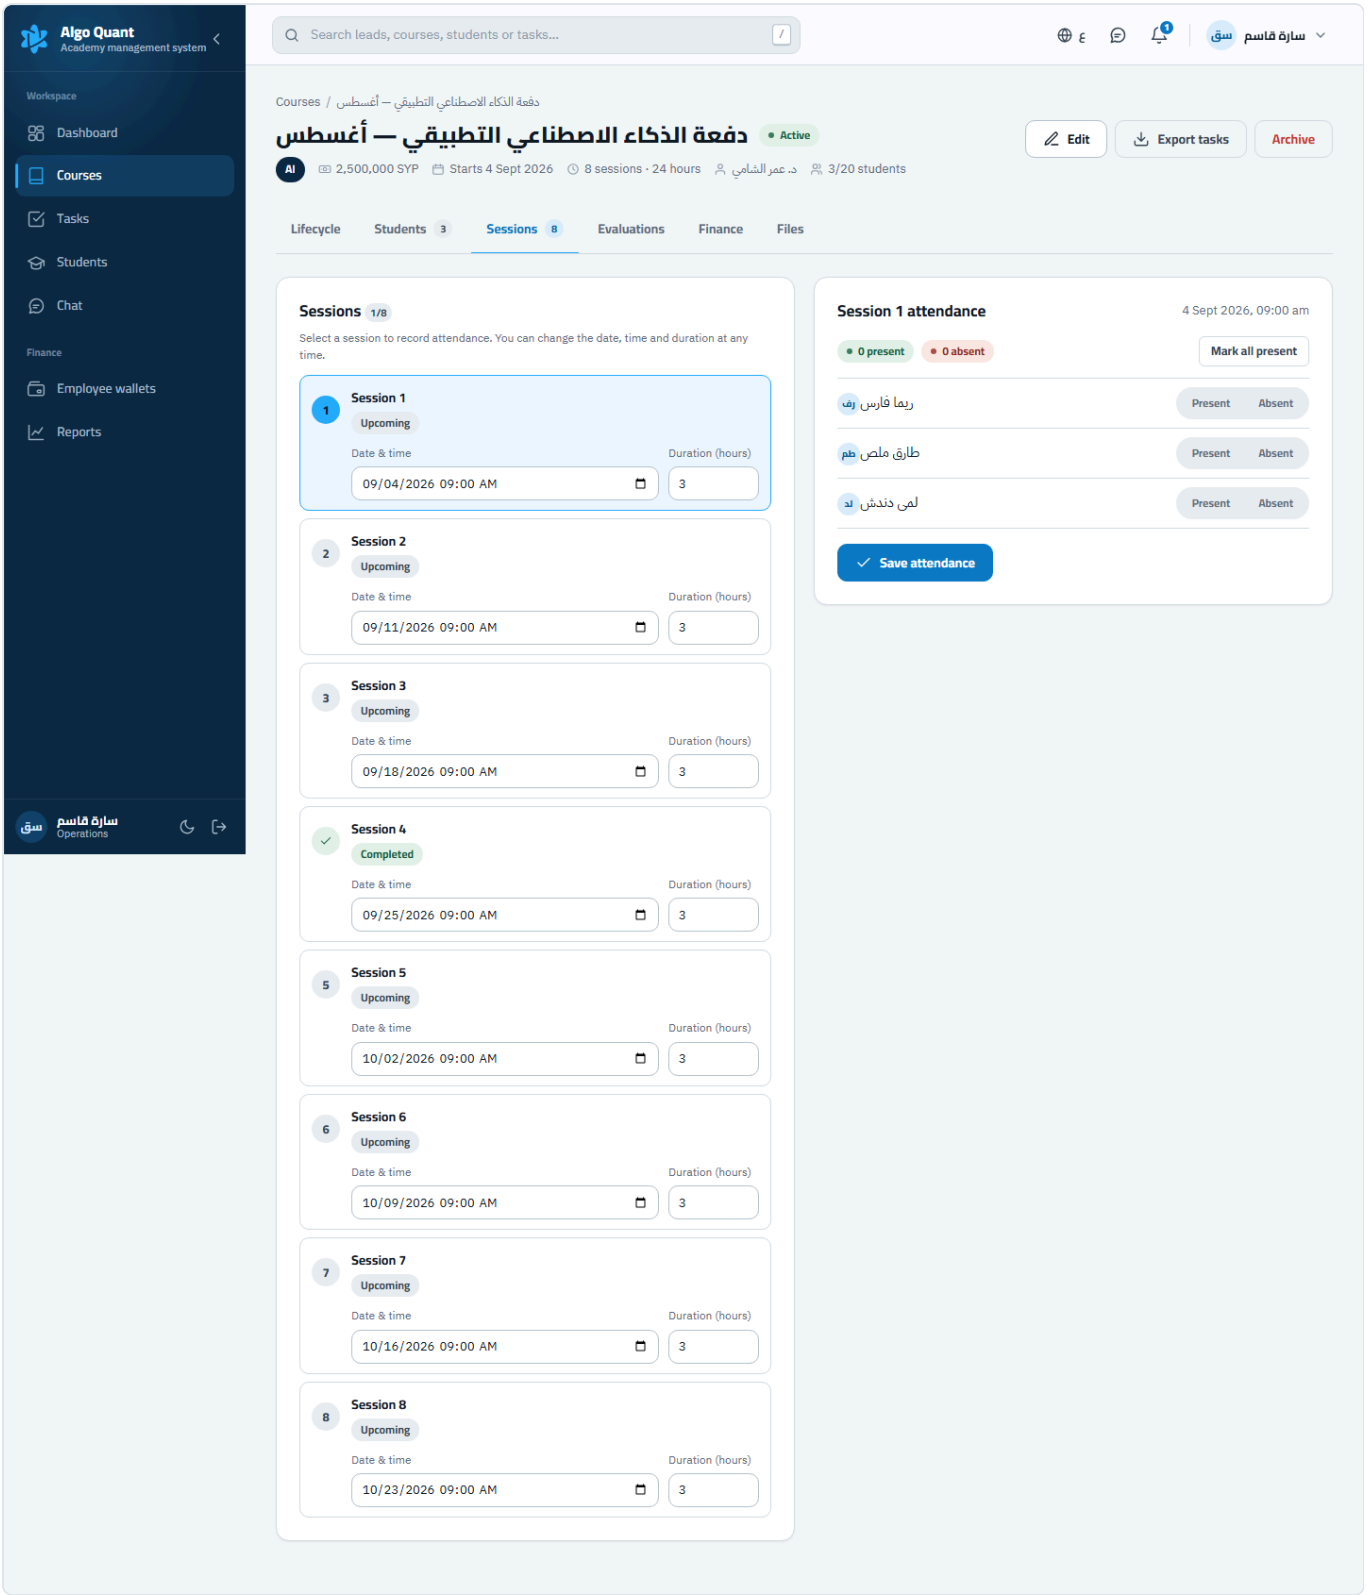

The lifecycle. The progress summary to one side gives overall completion and a breakdown by department; the list in the middle is filtered by the department buttons above it.

> **The figures cover everyone; the list covers you**
>
> The progress summary counts every department, but the task list shows only your own. The system says so under the summary, so an empty list never looks like a course with no work in it.

The students tab

On your own courses you see **the names only** — which is what recording attendance needs. Prices, amounts paid and balances are not shown to you: those are financial details that belong to operations and accounting.

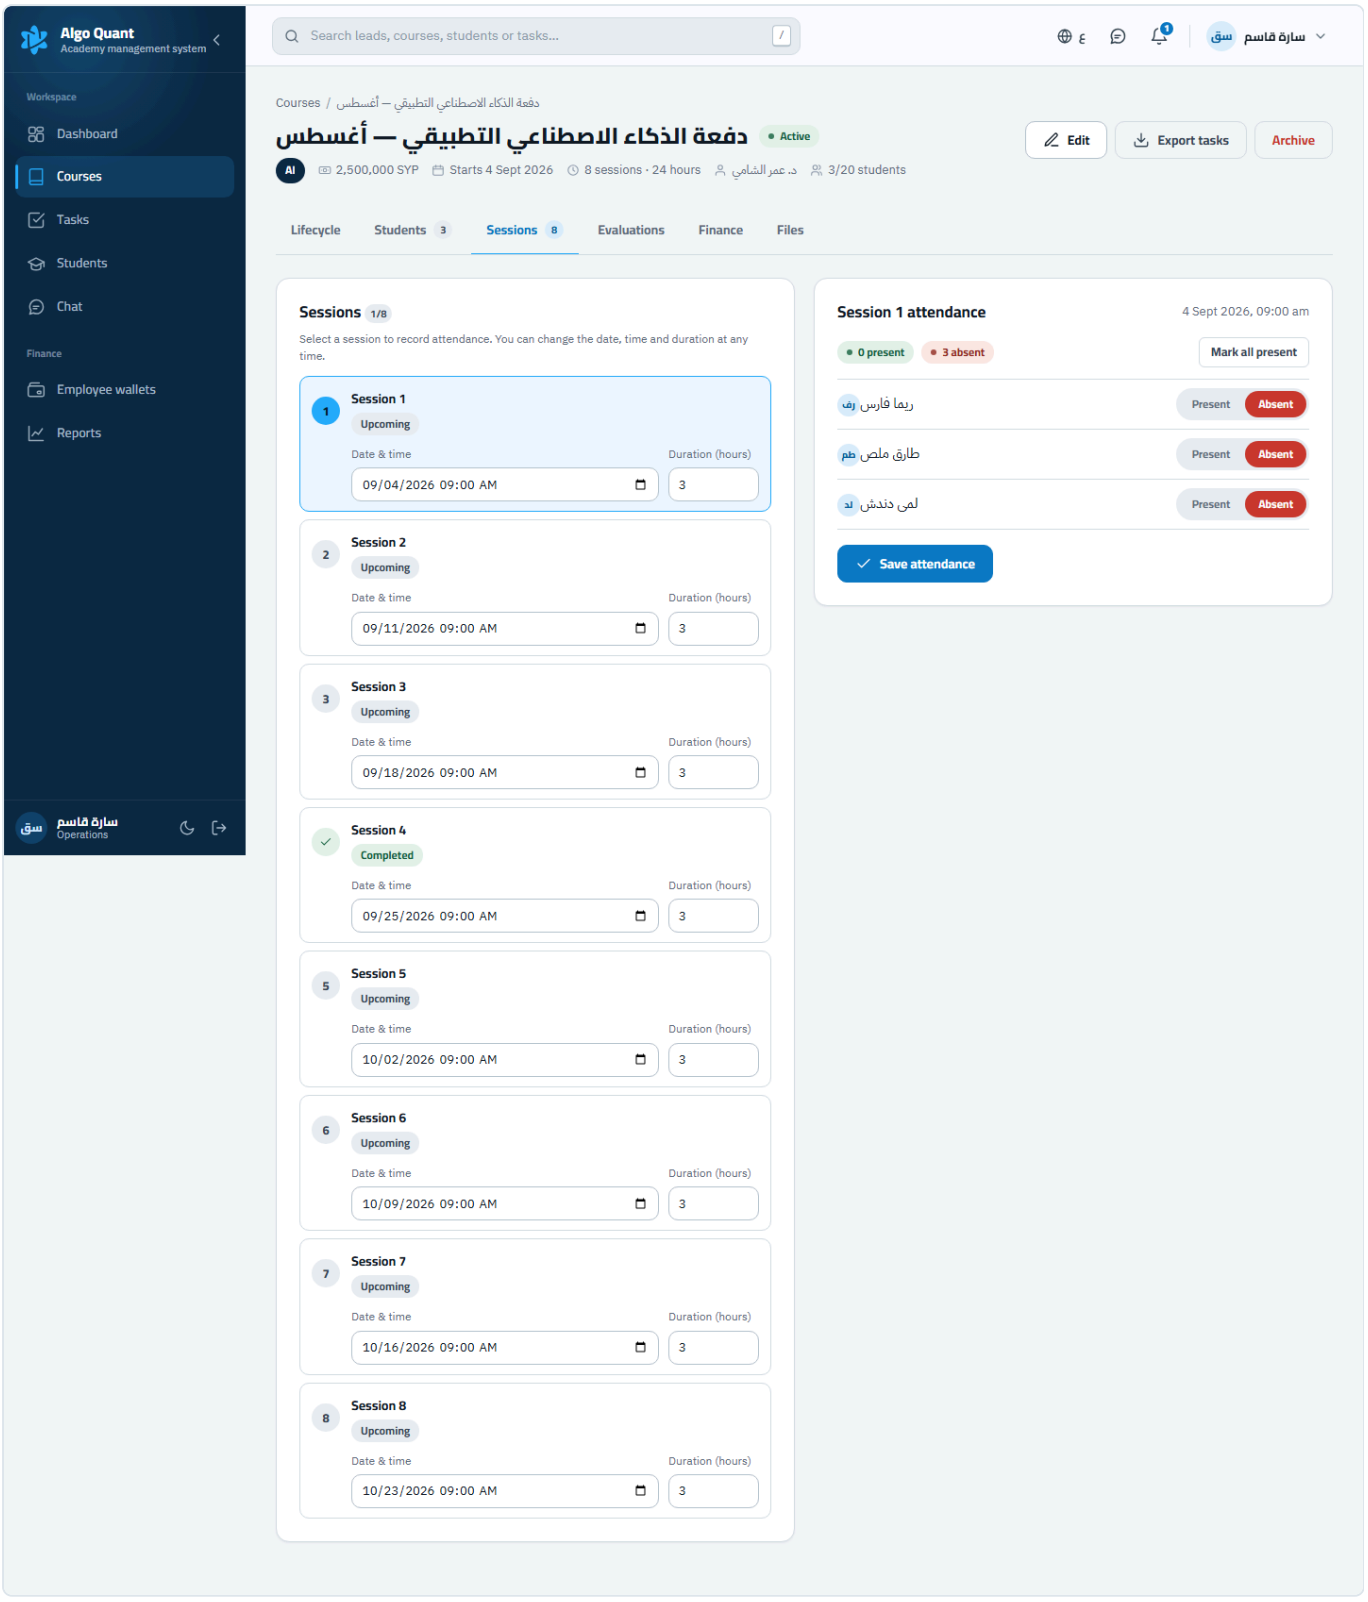

Sessions and attendance

Sessions. Numbered in order, each with a date, a time and a state: upcoming, completed or cancelled.

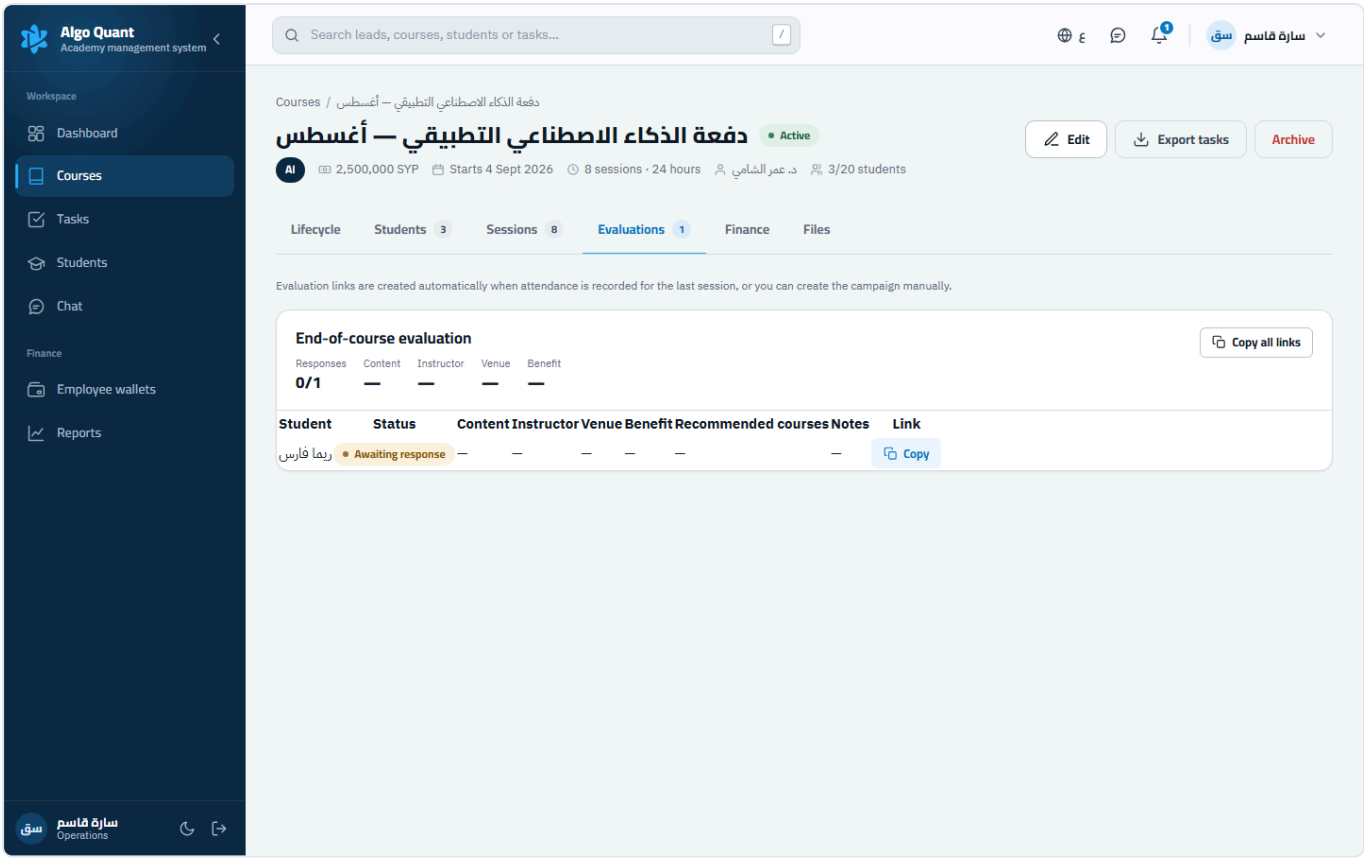

1. Open the **Sessions** tab and click the session you are recording.
2. The student list appears. Set each one to **Present**, **Absent**, **Late** or **Excused**.
3. The **All present** button fills the list in one go; then change the exceptions.

4 Save.

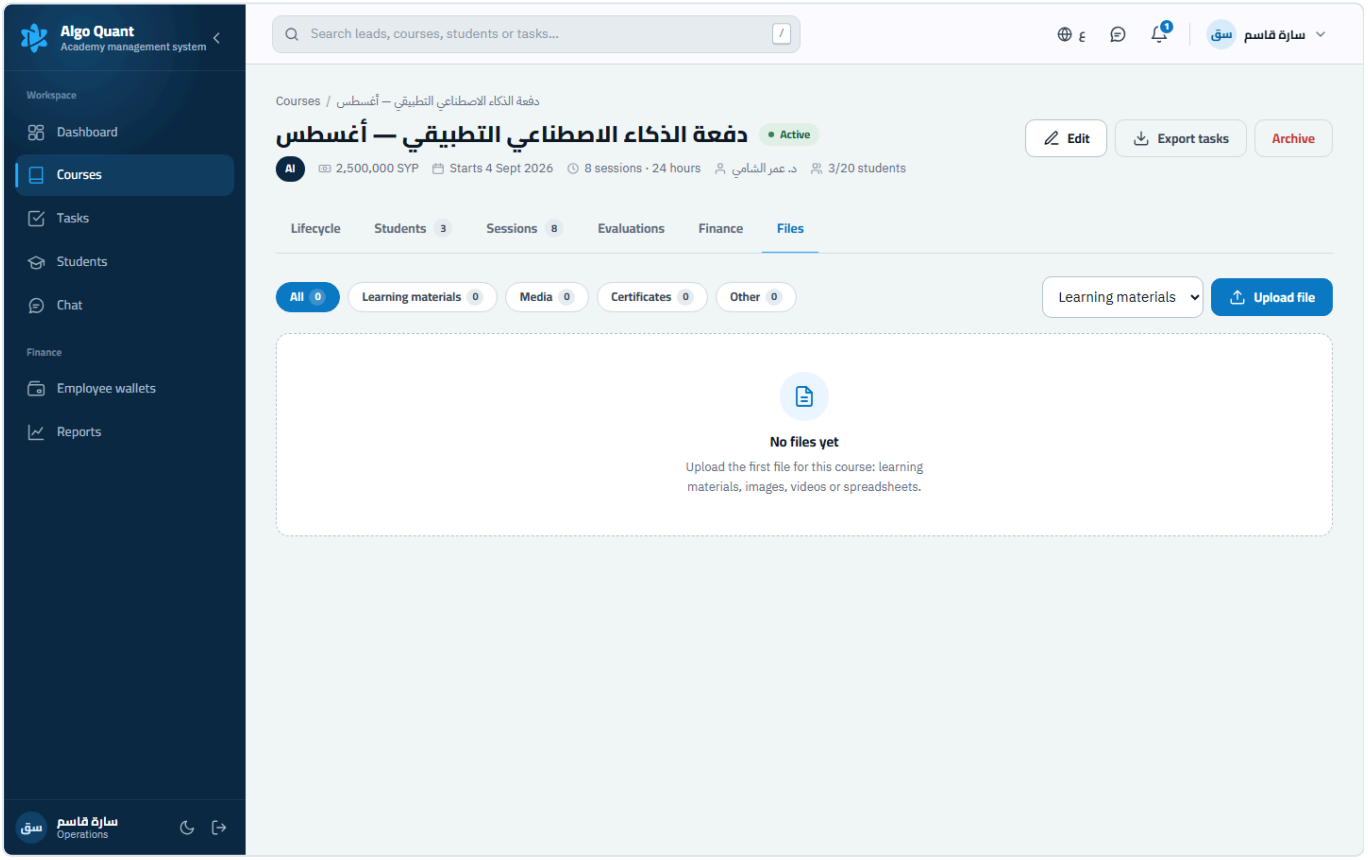

> **Recording attendance.** A student's first attendance moves their enrolment from Enrolled to Attending automatically, and the session fee is added to the instructor's wallet.

Evaluations, finance and files

Evaluations. Start a campaign after a session or at the end of the course, and a private link is generated for each student to copy and send.

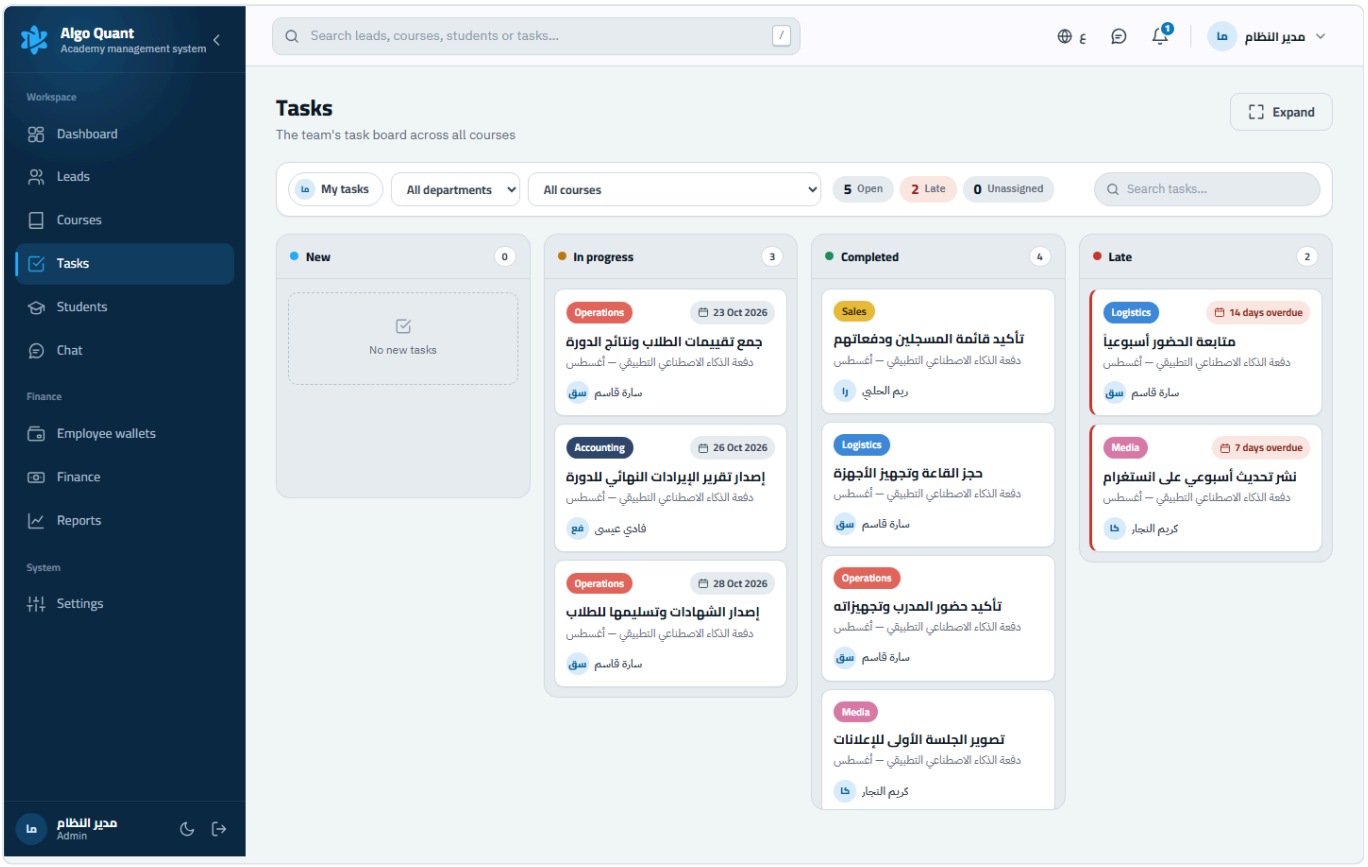

Files. Course material and images. Media, operations and the administrator upload and delete.

Chapter 5

Tasks

The team’s task board across every course.

Tasks are mostly not typed by hand: the task path template attached to a course generates them, with due dates worked out from the start date or from a session number. The tasks page gathers them all onto one board.

The board. Four columns: new, in progress, completed, late. Drag a card between columns to change its state.

Columns and states

State	What it means	Moves to
New	Nobody has started it.	In progress · Completed · Late
In progress	Someone is working on it.	Completed · Late
Late	Its due date has passed — the system moves it here by itself.	Completed
Completed	Done. Final.	—

"Open" includes late

Three counters sit above the board: **open** (everything unfinished, late included), **late**, and **unassigned**. Late is part of open, not an alternative to it.

Departments and assignment

Every task has a **department**: sales, media, operations, logistics or accounting. The department decides who is eligible, so when you assign one the system offers only the employees whose privileges match it, ordered by **how many open tasks they already have** so the least busy comes first.

A task with nobody on it is marked with a red dot and reads **Click to assign**. Click it to choose someone.

The Expand button

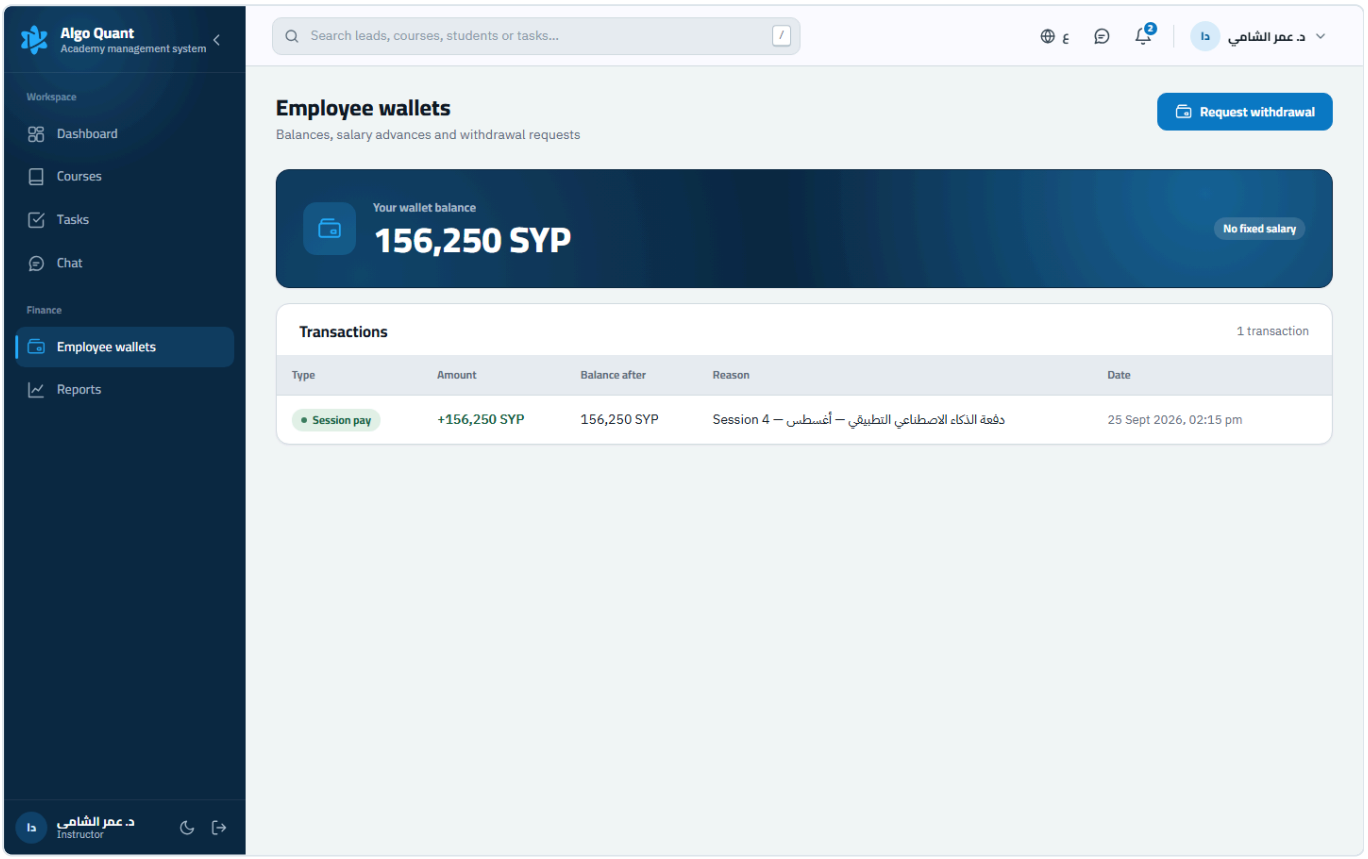

Hides the sidebar and header and fills the screen with the board — useful on the screen in a morning stand-up.

Chapter 6

Employee wallets

Your balance, your session fees, your withdrawals and advances.

Every employee has a wallet. Everyone sees their own; the administrator and accounting see all of them and handle the requests.

My wallet. The current balance, the employment type and the monthly salary if it is fixed, then the list of entries.

Kinds of entry

Entry	Where it comes from
Session fees	Added automatically when a session you teach is completed, at your percentage or hourly rate.
Profit share	Added when a month’s profit shares are approved.
Salary	Added when payroll is run.
Withdrawal	Deducted when an approved withdrawal request is paid.
Advance deduction	Taken off the next salary once an advance is approved.
Refund reversal / Cancelled session	An automatic correction when a student is refunded or a session that had been counted is cancelled.

Requesting a withdrawal

1. Press **Request a withdrawal** at the top of the page.
2. Enter the amount — it cannot exceed your balance.
3. Write the reason and send it.

Requested → Under review → Approved → Paid

You get a notification at every change of state, and the amount leaves your balance the moment the payment is recorded.

> **An empty wallet**
> If your wallet holds nothing, the request button stays disabled and says why, rather than refusing the request after you send it.

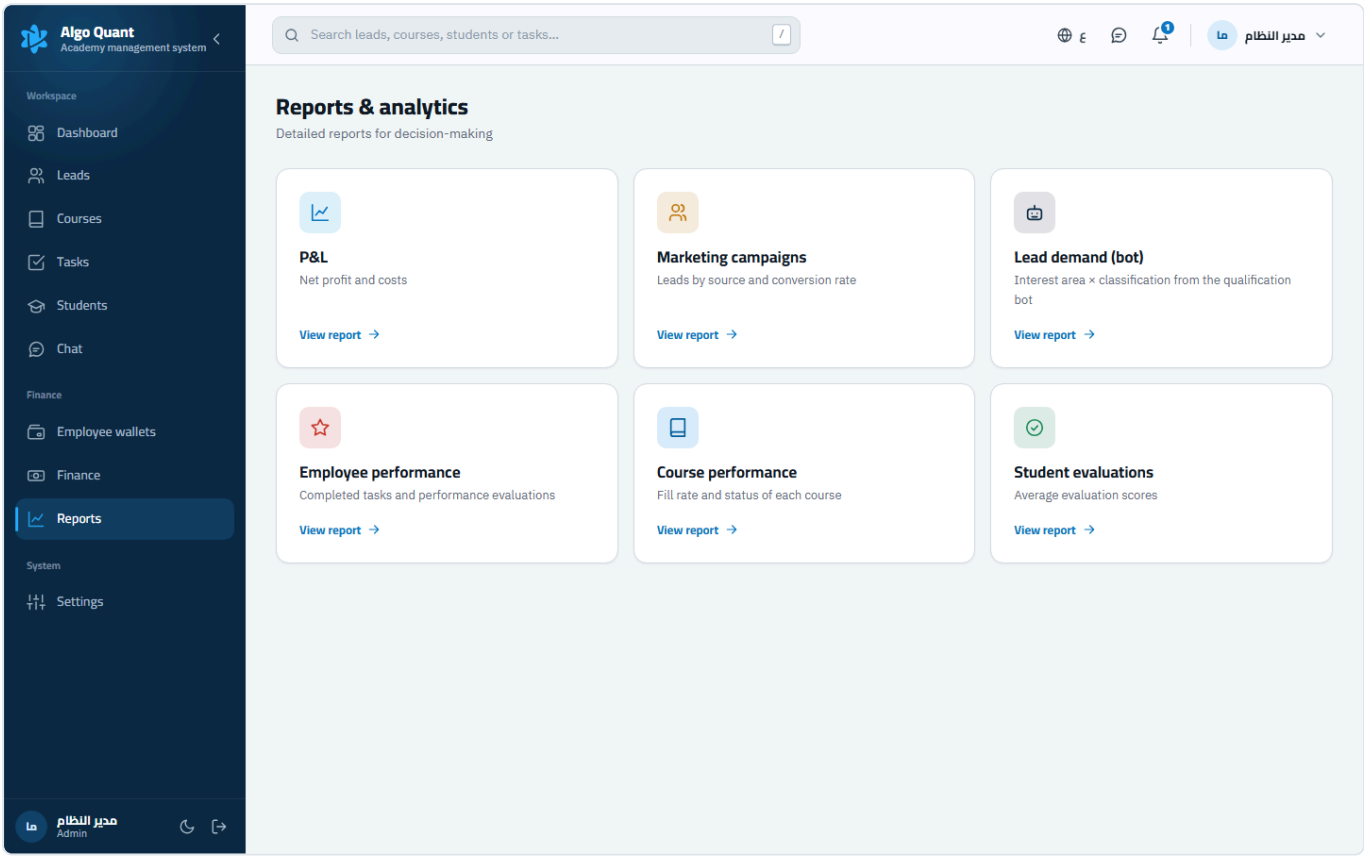

Requesting a salary advance

For fixed-salary employees only. An advance cannot exceed the monthly salary after approved, undeducted advances are taken off. The path is Under review → Approved → Deducted from salary.

Chapter 7

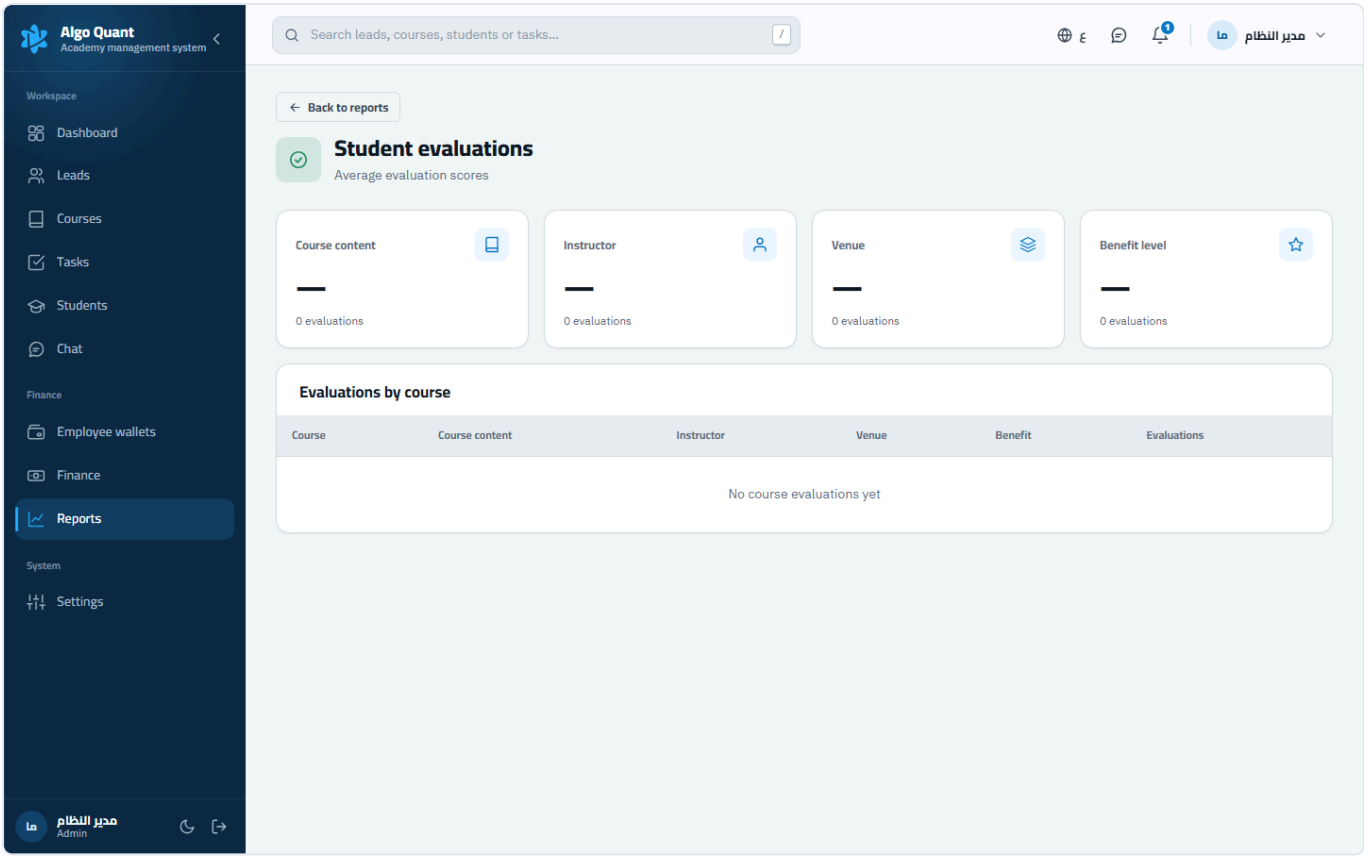

Reports

Six reports, each with its own privilege.

The report list. Only the reports your privileges allow appear; an instructor sees one, the administrator sees six.

Report	What it shows	For
Profit & loss	Revenue, expenses, owner withdrawals and net profit.	Admin · Accounting
Marketing campaigns	Leads by source and the conversion rate of each.	Admin · Sales
Lead demand (bot)	Area of interest against classification, as gathered by the qualification bot.	Admin · Sales
Staff performance	Completed tasks, performance ratings and absence.	Admin
Course performance	Fill rate and status for every course.	Admin · Operations
Student evaluations	Average scores for the course, the instructor, the room and usefulness.	Admin · Operations · Instructor

The evaluations report. Averages for the four scores, with students' comments and the courses they suggest.

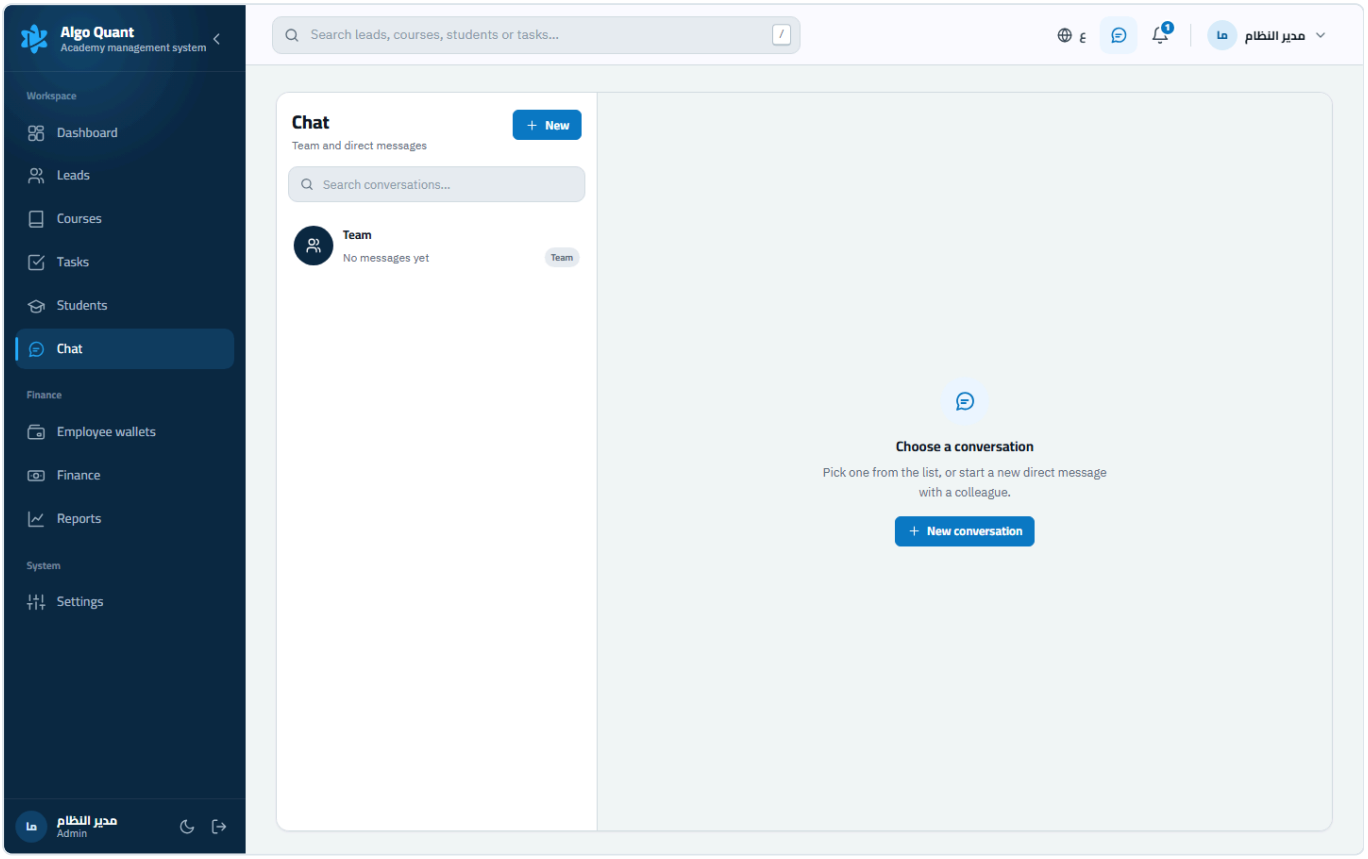

Report links

The address of an open report carries its name, so you can copy the link and send it to a colleague. If their privileges do not allow it they get a plain message instead of an empty page.

Chapter 8

Chat

The team channel and private messages.

Chat. The team channel holds everyone, alongside private conversations between two colleagues.

- Press **New** and pick a colleague to start a private conversation.
- You can **attach an image** to a message.
- The unread count appears on the chat icon in the top bar.
- Messages arrive immediately — no need to refresh.

Chat is not the record

Decisions about a student or a course belong in the **notes** on that lead or student, not in chat — there they stay attached to the file and appear in the activity log.

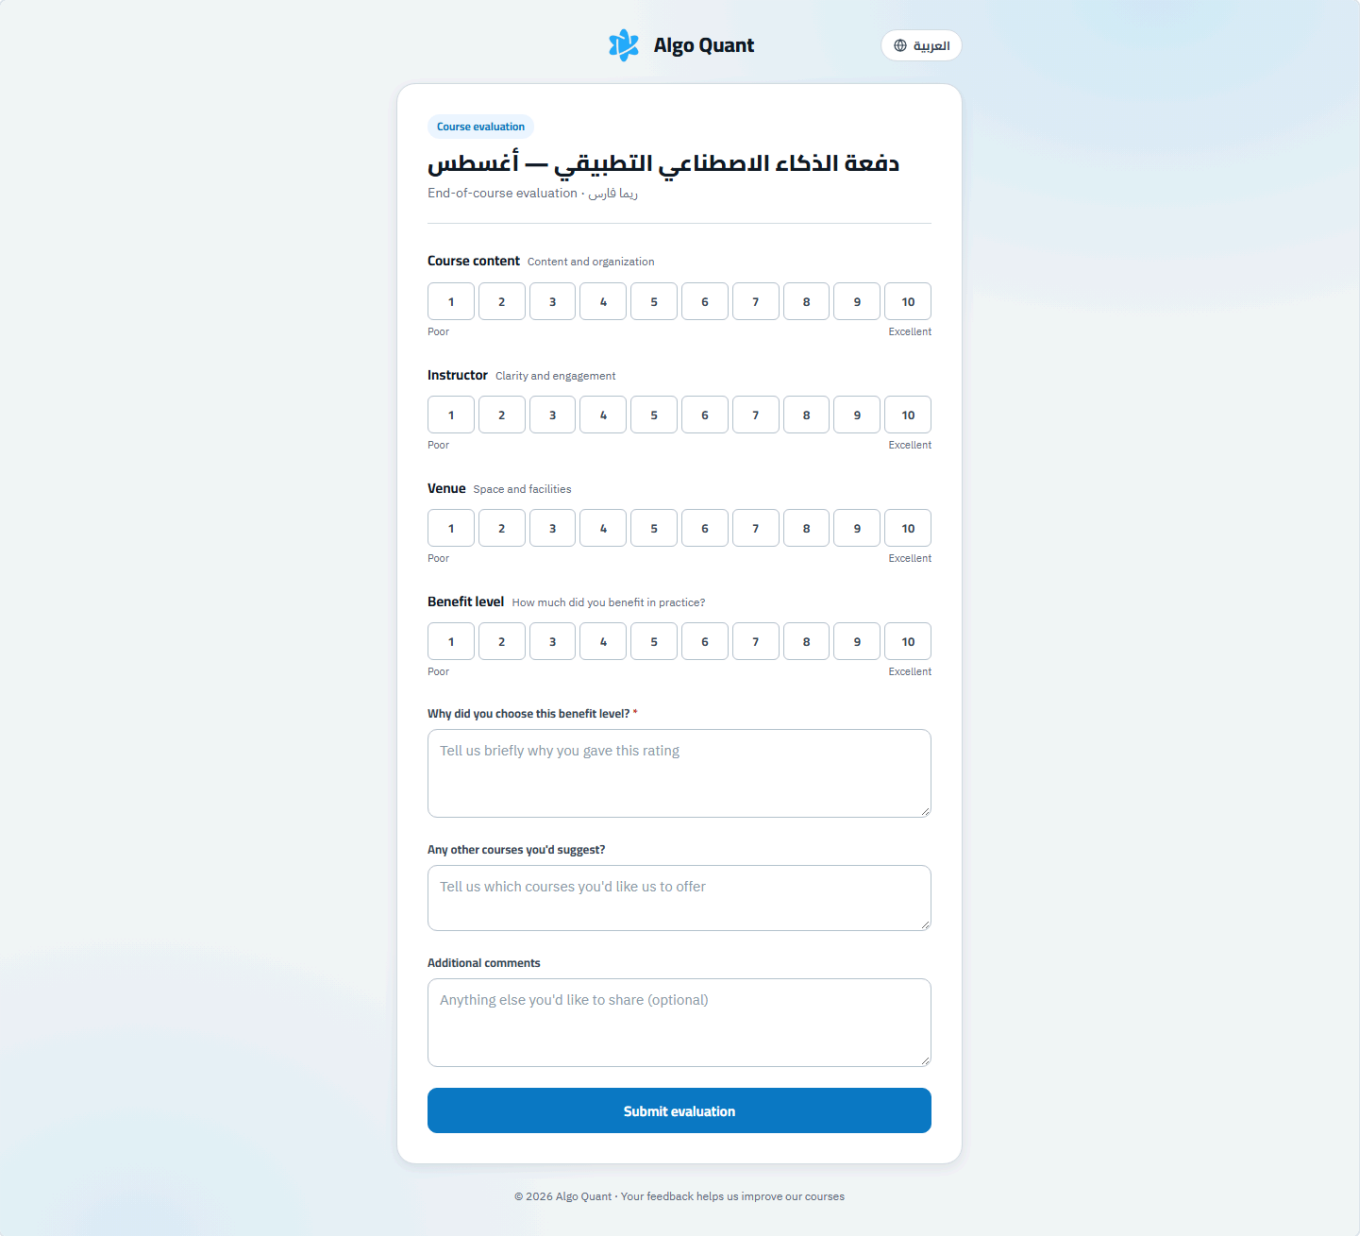

Chapter 9

Student evaluations

From starting a campaign to reading the result.

1. Open the course → the **Evaluations** tab.
2. Start a campaign: **after a session** or **at the end of the course**.
3. The system generates **a private link for each student**, valid for a set period and usable once.
4. Copy the links and send them to the students (WhatsApp, SMS, email).
5. Replies appear on the evaluations tab and in the student evaluations report.

The link opens a public page that needs no sign-in, works on a phone and has a language toggle. The student scores four things out of 10: **the course content**, **the instructor**, **the room** and **how useful it was** — and the reason for the usefulness score is required.

> **What the student sees.** An expired or already-used link shows a clear message asking them to contact the academy.

Chapter 10

Quick reference

Tables to come back to when you need them.

Who can open which page

Page	Admin	Sales	Ops	Acct	Media	Instr
Dashboard	✓	✓	✓	✓	✓	✓

Who can do what

Action	Privileges
Create, edit, move and assign a lead	Admin · Sales
Convert a lead to a student with a first payment	Admin · Sales · Ops · Accounting
Delete a lead	Admin
Create and edit a course, move its status, edit its sessions	Admin · Ops
Swap the task template, regenerate tasks, delete a course	Admin
Create and edit a student, change their status, enrol them	Admin · Ops
Delete a student	Admin
Record a payment	Admin · Ops · Accounting
Void a payment	Admin · Accounting
Record attendance	Admin · Ops · Instructor
Issue a certificate · start an evaluation campaign	Admin · Ops
Expenses: view, add, delete	Admin · Accounting

Action	Privileges
Owner withdrawals: view and add	Admin
Refunds, withdrawals and advances: review, approve, pay	Admin · Accounting
Profit shares: compute, approve, reject	Admin · Accounting
See every wallet	Admin · Accounting
Upload and delete course files	Admin · Ops · Media
All settings, document numbering and the activity log	Admin

What the states mean

Student

Active | Frozen | Graduated | Withdrawn | Blocked

Enrolment

Enrolled | Attending | Completed | Certified | Dropped

Payment

Unpaid | Partially paid | Paid in full

Attendance

Present | Absent | Late | Excused

Session

Upcoming | Completed | Cancelled

Certificate

Pending | Issued | Revoked

Refund

Awaiting review | Under review | Approved | Paid out | Rejected

Withdrawal request

Requested | Under review | Approved | Paid | Rejected | Cancelled

Salary advance

Under review | Approved | Rejected | Deducted from salary

Common questions

I cannot see my course's tasks

Those tasks belong to other departments (sales, operations, media...). You see your own department's tasks only, and the system says so under the progress summary.

I opened a link and landed on the dashboard

Your privileges do not cover that page, and a message said so. Ask your administrator for the privilege if your work needs it.

I forgot my password

There is no self-service reset. Your administrator sets a new one from the employees page with the Password button.

Algo Quant — Instructor guide, Version 1.0.

The screenshots here come from the system with demonstration data; the names and figures you see will be your academy’s own.
